

# Claims

- [c1] What is claimed is:
- 1.A file managing method for an image capturing apparatus, the method comprising:  
selecting at least one image from a plurality of images captured by the image capturing apparatus as a directory name of the plurality of images.
  - [c2] 2.The method of claim 1, further comprising classifying the plurality of images using the directory name.
  - [c3] 3.The method of claim 1, further comprising determining whether to set up a first image captured after the image capturing apparatus is turned on as the directory name.
  - [c4] 4.The method of claim 1, further comprising selecting other images from the plurality of images to become the directory name of the plurality of images.
  - [c5] 5.The method of claim 1, wherein the image capturing apparatus is a digital camera or a digital camcorder.
  - [c6] 6.An image capturing apparatus for implementing the method of claim 1.

- [c7] 7. An image capturing apparatus comprising:  
a viewfinder for viewing an object; and  
a control button set for controlling relating functions of the image capturing apparatus, the control button set comprising a control button for selecting at least one image from a plurality of images captured by the image capturing apparatus as a directory name of the plurality of images.
- [c8] 8. The image capturing apparatus of claim 7, further comprising a power button for turning on the image capturing apparatus.
- [c9] 9. The image capturing apparatus of claim 8, wherein the control button set further comprises a setting button for selecting a first image captured after the image capturing apparatus is turned on as the directory name.
- [c10] 10. The image capturing apparatus of claim 7, wherein the viewfinder is an electrical viewfinder.
- [c11] 11. The image capturing apparatus of claim 7 being a digital camera or a digital camcorder.
